

Professional Summary

Web application developer with 6 years of software engineering experience in both corporate and freelance settings. Currently building **JobHuntX**, a full-stack job scraping application using **ASP.NET Core and React**, to demonstrate production-level architecture and development skills. Actively seeking web developer positions in Australia with the goal of obtaining permanent residency (subclass 190 / 491). Open to relocation and immediate start.

Key Skills

- **Frontend:** React.js, TypeScript, Vite, Tailwind CSS
- **Backend:** ASP.NET Core, C#, RESTful API design
- **DevOps / Development Tools:** Docker, GitHub Actions, Linux, Cloud Hosting, CI/CD pipelines
- **Documentation & SEO:** Structured READMEs, architecture diagrams, SEO-aware design

Technical Projects

JobHuntX – Job Aggregation and Scraping Web App (2025–Present)

[Live Demo](#) / [Source Code](#)

Independently developing a job aggregation platform built with ASP.NET Core (C#) and React. Designed with a strong focus on performance, maintainability, and CI/CD workflows.

- Scrapes and aggregates job postings from RSS feeds, public APIs, and websites
- Implements caching with IMemoryCache to improve performance
- Provides centralized error handling and logging
- Configured development and production environments using Docker and GitHub Actions

Work Experience

Web Application Developer (Freelance & Personal Projects) — Japan → Australia (Remote)

Feb 2020 – Present

- Developed a React + .NET-based video conferencing platform as part of a remote contract team, primarily responsible for the frontend
- Delivered multiple full-stack web applications from design to deployment
- Created a game search application using public APIs
- Operated affiliate web apps optimized for SEO and monetization
- Built various small-scale tools, including a Twitter image viewer

Software Engineer — CRE Co., Ltd., Nagoya, Japan

Apr 2017 – Jan 2020

- Developed internal support systems related to Boeing 787 wing production as an in-house engineer
- Led end-to-end development of a scheduling web application for factory production using Java, Vue.js, and SQL Server
- Maintained and enhanced legacy tools with Excel VBA
- Handled operations and troubleshooting for internal Windows Server and network infrastructure

Education & Certifications

- **Diploma of Information and Communication Technology**
(Graduated from National Institute of Technology, Kinki College, Japan)
- **Passed:** Information Technology Engineer Examination (Fundamental Level)

Additional Information

- Continuously building web applications to demonstrate technical capabilities for employment in Australia
- **Visa Status:** Working Holiday Visa (2nd year, valid until 11 March 2026)
